

Meeting minutes # 4

From meeting date : 23-11-2016 9.00-10.00 AM

Next meeting date : 07-12-2016 9.00-10.00 AM

Today, we've talked about

- the architecture of new system
- The sequence diagram for Login, dashboard, and seeing site descriptions.

Conclusion:

- Database and business logic part will be on the same server, so we don't need to concern about network latency between them.
- From sequence diagram, we should think about what system will do when user logout in all step and when they login again it should show all reservations and its status of users.
- Next meeting, Nadya will give us the virtual machines which we can use for development.
