

Meeting minutes #10

From meeting date : 24 MAR 2017 9.00-10.00 AM

Next meeting date : 08 APR 2017 9.00-10.00 AM

Today, we've talk about our new user interface design of searching resources and getting specific users' reservations and demo for creating a reservation.

Comment:

- The cancellation window should have some message to warn user that the virtual machine will be terminated after they confirm.
- The reservation window should have an instruction to access VM.
- When user clicks on a RESERVE button on top right without any selected card, the system should tell user that they have to click on any marker first or the system should have an instruction on the dashboard.
- The menu bar should add "help" menu.
- The system should have a tutorial to reserve any resources which can be closed.

To do:

- Frontend : Reservations, History, Search resources menu, and edit from comments.
- Prepare for usability test.
- Check for working with CRON job (after go to Pragma32).
- Test when there are more than one users at a time. (Transaction)
