Meeting minutes #8

From meeting date :   24 FEB 2017   9.00-10.00 AM
Next meeting date :   10 MAR 2017 9.00-10.00 AM

Today, we've talk about the results from implementing Dashboard UI and search in backend (python).

Comment:
- Search box on the right top is good for user, but we should change the label inside it to "search by name".
- Limit length for reservation can be 1 month or 2 months, but it should be able to extend the reservation or cancel it if user want.
- We should remind user when it is almost time for the reservation that user had created, so user can cancel it and let it be used by another user.

Next meeting:
- Send abstract for demo presentation and poster. (tell only overview of presentation don't need to be so specific.)
